

What kind of license will I receive when I finish school?

Apprentices will have the ability to earn their Journeyman Fire Alarm license, their telecommunications certifications and by the time they finish the program go on to earn their RI Journeyman's license, and most continue to get their Massachusetts and Connecticut licenses as well.

Electrical work specialties'

Some students may want to specialize in Telecommunications

Photovoltaics

Motor controls and Instrumentation

Programmable Logic controllers

Power distribution

Grounding and bonding

Traffic controls

Fire Alarm systems

Instrumentation

Classrooms

The Training Facility has Theory classrooms and hands on lab areas. Students Skill levels are evaluated by instructors and entered into a data base for Portfolio purposes.

Students who have demonstrated proficiency in Skill areas may opt to get Craft certified (National certification).

IBEW LU 99

**Inside wireman
Apprenticeship Program**

What is an inside wireman?

Primarily these men work electrical construction in residential, commercial and industrial settings.

Why IBEW training?

The training provided by the IBEW is second to none. IBEW Training facilities around the country educate and provide

training for our current and future work forces.

How long is the program?

The electrical apprenticeship training is a 5 (five) year program and includes theory and hands on training..

What does it cost?

The cost of education to the apprentice is free. Students pay only for the cost of books and lab fees. School expenses are paid generally by the working Journeymen and women.

Where will I work?

Typically apprentice's works under the supervision of Journeymen assisting them perform their task.

What kind of certifications will I receive?

IBEW apprentices start in a summer boot camp and earn their OSHA 10 safety card, but during their training they will learn and earn other certificates such as Hilti, CAD welding, CPR and NFPA certs.

Who recognizes this training?

Students who complete the program are issued a transcript that is recognized by RI State colleges and a certificate of completion recognized all over the world.

The Local 99 JATC

Educational and Training facility

You really need to come and visit our Training facility and see what JATC training Facility has to offer you, your program your business and your construction company.

Visit our web page at ibew99.org , click [JATC](#) and see for yourself what we are doing (pictures of the training facility)

See what courses we are currently offering to members and apprentices from our local and our sister Unions.

The Training Facility offers Advanced training , Professional development courses and Continuing education training to its members. Last year we trained six times more Journeyman than apprentices.

Some of our Journeyman refresher courses include (Pipe bending, Motors and Controls, Variable Frequency Drives, Fire Alarm and Programmable Logic Controllers), specialty classes in (confined space training, OSHA 10 and 30, foreman training, code of excellence), a College degree program (Community College Of Rhode Island degree in Electrical technologies)

We offer our member apprentices, journeyman and sister Locals a Nationally recognized Skills and Craft performance training, testing and certification Facility with Nationally recognized teachers and instructors

Our Nationally accredited Craft Level Certification Testing and Examination facility evaluates and certifies an Electricians knowledge and ability level. (a must for organizing)

Special training classes are being held every Friday night and individualized instruction is available for those who need / want to develop or improve their abilities.

In our computer lab we offer journeyman NJATC on- line courses (see our website for a listing)

We currently offer to our apprentices a five year curriculum including Residential wiring, Telecommunications, Commercial wiring, theory and hands on techniques as well as renewable energy technology

Students who graduate from our program are awarded 45 college credits toward their degree at participating Rhode Island Colleges.

Local 99 apprentices can also join **Skills USA** the second largest student organization in the country and compete in both Local and National Skills USA competition opportunities in Residential and Industrial Motor Controls

IBEW Local 99 JATC is proud to showcase our award winning competitors, 9 National **Skills USA** medal winners since 2004

Our Instructors are Graduates of NTI and most are certified teachers in the State of Rhode Island, Electrical inspectors or Electrical engineers.

So , call, or stop and see for yourself Rhode Island's best kept secret.
